You're ready to take the next step in your career by becoming a Project Management Professional. You've put in your hours and earned your experience on the job. But are you ready for the rigour of the PMP exam?

Over ninety-five percent of project managers who have completed the Velociteach PMP® Exam Prep course have passed the PMP® exam on their first try.

The Velociteach PMP® Exam Prep system includes three components:

First component — an intensive 3-day instructor led course, consisting of 17 modules that cover the entire scope of knowledge required for passing the PMP® exam. Taught by industry experts, the course is chock full of advice, study techniques, and best practices for passing the exam. Materials include a comprehensive workbook with course slides and plenty of room for notes to help you study.

Second component — the InSite e-learning system, which includes an e-learning component and a PMP® exam testing lab. The e-learning portion supplements the instructor led course and provides about 15 – 20 hours of project management training reinforcement. Participants can go through all of the e-learning modules, or select specific modules to clarify and review specific exam topics. *By completing the entire e-learning module, participants can earn up to 20 PDUs (in addition to the 21 PDUs earned during the 3-day instructor-led course).*

The testing lab allows you to simulate the taking of an actual 4 hour PMP® exam, or create custom tests of any length focused on specific areas of your choice. The results of each test are recorded, so you can see where you need to focus in order to pass the exam.

Third component — Andy Crowe's book *The PMP® Exam: How to Pass on Your First Try*, laminated quick reference guide and audio files. Use these as you study leading up to your exam, to help ensure that you know the material inside and out.
